A CS-COUSIN group wishes to progress to selecting instruments for its core domains.

1. Select domain(s)
2. Prepare a protocol (if not already done)
3. Review by CS-COUSIN
   - Approval: Yes
     - Publish and register (if not already done)
     - Identify all existing instruments
       - Do any instruments to measure this domain exist?
         - Yes: Select one instrument per domain using formal consensus methods
           - Instrument published at CS-COUSIN homepage and in journal
         - No: Consider creating/adapt a new one
           - Investigate measurement properties
             - Is there convincing evidence supporting instruments?
               - Yes
               - No
               - No: Investigate measurement properties
     - No
   - Revise

Development of outcome measurement instrument finished

Dissemination and implementation
